SELECTED PROJECTS

- Wanderlust | Node.js, Express.js, MongoDB, EJS, MapTiler

[Code](#) | [Live](#)

 - Built an Airbnb-inspired rental-listing platform with authentication, listing/review workflows, and map-based location features.
 - Created as my college major project to master full-stack CRUD: users can create listings with images, amenities, pricing and location, browse/book other listings, and publish reviews.
- Swasthya Setu | Next.js, JavaScript, Node.js, MongoDB

[Live](#)

 - Built a hackathon-winning healthcare platform in 48 hours for health guidance and secure personal-record management.
 - Implemented patient requests for hospital beds and blood, hospital-side request handling, and search/filtering by location, hospital name, and healthcare requirements.
- EchoMeet | Next.js, TypeScript, ZegoCloud

[Live](#)

 - Developed a video-conferencing application with real-time video calls, chat, and screen sharing using ZegoCloud.
 - Built the project to understand real-time communication patterns, room-based sessions, event-driven updates, and WebSocket/Socket.io concepts.
- AI-Powered Chatbot | React.js, Gemini API

[Code](#) | [Live](#)

 - Built a conversational AI interface using Google’s Gemini API for real-time question answering and LLM interaction.
 - Created while learning AI application development to explore LLM workflows, embeddings/vectorization, vector-database concepts, and integrating AI capabilities into web products.
- Attendance Management System | MERN Stack

[Live](#)

 - Developed a role-based admin/teacher/student system with attendance workflows, analytics, and PDF/Excel export.
 - Designed for college use with separate Admin (HOD), Teacher, and Student dashboards, strengthening practical understanding of authentication, authorization, and role-based access control.
